Projects

UX Engineer
Capstone Project - AgriBoost
September 2018 – April 2019

AgriBoost is a Precision Agriculture tool designed by my team and I, to help farmers make better decisions while farming.

As part of the UI/UX team – I constructed wireframes, generated a high-fidelity prototype using Proto.io and developed our product's website using the React.js framework.

Experience

Junior Controls Specialist
JMP Solutions – Burlington, Canada
May 2017 – May 2018

Designed electric control panels that were subject to electrical and physical standards. Co-ordinated project procurement activities such as vendor selection, quote negotiations and logistics for several projects during my term.

Building Efficiency Systems Intern
Johnson Controls Inc. – Dubai, UAE
May 2016 – August 2016

Assisted product managers in launching various product lines. Constructed product catalogs, customer compliance sheets and Inventory lists.
